60 Minutes Uncovers Pelosi Insider Stock Trades

By Newsmax Wires

•

•

Former House Speaker Nancy Pelosi bought stock in initial public offerings (IPOs) that earned hefty returns while she had access to insider information that would have been illegal for an average citizen to trade with — even though it is perfectly legal for elected officials, CBS's "60 Minutes" reported Sunday night.

In a piece relying on data collected from the conservative Hoover Institution, "60 Minutes" revealed that elected officials like Pelosi are exempt from insider trading laws — regulations that carry hefty prison sentences and fines for any other citizen who trades stocks with private information on companies that can affect their stock price.

In the case of elected officials — this secret information ranges from timely details on lucrative federal contracts to legislation that can cause companies' stocks to rise and fall dramatically.

Editor's Note: [Repeal Obamacare? Vote Here Now](#)

How do they get away with it? Lawmakers have exempted themselves from the laws that govern every other citizen.

Pelosi, D-Calif., and her husband have participated in at least eight IPOs while having access to information directly relating to the companies involved. One of those came in 2008, from Visa, just as a troublesome piece of legislation that would have hurt credit card companies, began making its way through the House.

— Undisturbed by a potential conflict of interest the Pelosis purchased 5,000 shares of Visa at the initial price of \$44 dollars. Two days later it was trading at \$64. The credit card legislation never made it to the floor of the House, — [Steve Kroft of "60 Minutes" reported.](#)

Kroft confronted Pelosi at a regular press conference after she declined an interview.

Kroft: Madam Leader, I wanted to ask you why you and your husband back in March of 2008 accepted and participated in a very large IPO deal from Visa at a time there was major legislation affecting the credit card companies making its way through the — through the House.

Nancy Pelosi: But â

Kroft: And did you consider that to be a conflict of interest?

Pelosi: The â y â I â I don't know what your point is of your question. Is there some point that you want to make with that?

Kroft: Well, I â I â I guess what I'm asking is do you think it's all right for a speaker to accept a very preferential, favorable stock deal?

Pelosi: Well, we didn't.

Kroft: You participated in the IPO. And at the time you were speaker of the House. You don't think it was a conflict of interest or had the appearance--

Pelosi: No, it was not â

Kroft: â of a conflict of interest?

Pelosi: â it doesn't â it only has appearance if you decide that you're going to have â elaborate on a false premise. But it â it â it's not true and that's that.

Kroft: I don't understand what part's not true.

Pelosi: Yes sir. That â that I would act upon an investment.

The Hoover Institutionâ s Peter Schweizer stressed that what Pelosi did was completely legal.

â There are all sorts of forms of honest grafts that congressmen engage in that allow them to become very, very wealthy. So it's not illegal, but I think it's highly unethical, I think it's highly offensive, and wrong,â he told Kroft.

â â Insider trading on the stock market. If you are a member of Congress, those laws are deemed not to apply,â Schweizer added. â The fact is, if you sit on a healthcare committee and you know that Medicare, for example, is â is considering not reimbursing for a certain drug that's market moving information. And if you can trade stock on â off of that information and do so legally, that's a great profit making opportunity. And that sort of behavior goes on.â

Pelosiâ s office issued a statement Sunday saying, â It is very troubling that â 60 Minutesâ would base their reporting off of an already-discredited conservative author who has made a career out of attacking Democrats.â

Schweizerâ s books include â Do as I Say (Not as I Do): Profiles in Liberal Hypocrisy,â and â Architects of Ruin,â according to Schweizerâ s page on the Hoover Institution website.

THE OVERVIEW DETAILS...

The 30+ companies who witnessed these crimes have made certain that every single law enforcement, regulatory, congressional investigation and investigative journalist office has the complete information on this case. Not a single agency, investigator or task force has denied that any of these criminal actions took place. The companies have requested that agencies and investigators inform them if they are laboring under any misconceptions, or misunderstood any of the evidence. To date, not a single investigator has stated that any of the conclusions are erroneous. While the public is very aware of the "Solyndra" portion of the case, the public has not been shown the entire Solyndra investigation case files, nor seen the follow-on investigations, which implicate some very well-known parties.

So far, not a single agency, investigator or task force has filed a major criminal indictments against the primary parties involved, because the perpetrators are very large investment banks, technology companies and billionaire campaign backers who have ordered cover-ups, and delays, to be enacted. Smaller players have been fired or forced to resign from federal jobs, Steven Rattner was indicted for securities fraud. Raj Gupta

was put in jail. Some of the front companies were bankrupted, but the big crimes are still underway and they affect every American taxpayer.

There are now over 200+ whistle-blowers, evidential witnesses and corroborating testimony experts willing to testify, publicly, in an open Congressional/law enforcement network-media-broadcast hearing. The witnesses are prepared to swear, under oath, to the truth of their statements. To date, no party has accepted responsibility for organizing such a hearing.

In short: This was a massive kick-back, stock fraud, insider trading crime!

The following videos, embedded on the following pages, when viewed in order, will give the average person a good overview of the incident:

WEEKLY UPDATES FOR THE TEAM:

(The following information is based on hundreds of thousands of pages of evidence, a large number of videos, and many federal, state and major news organization investigation case files which are now available to attorney's) Draft 1.9

This may sound unbelievable to some. For those who read the news, things as unbelievable as Genocide, Bernie Madoff stealing billions of dollars, 76 million customer bank accounts getting stolen from JP Morgan, and tens of thousands of other strange things, happen every day.

The story of one of the cases:

Innovation Vs. The Dirty Politicians!

So an American small business walks into a conference room...

...and accidentally steps into the middle of a multi-hundred billion dollar government embezzlement scheme.

So they did the right thing, the thing they were taught to do in school: (ie: "tell the nice policeman about the bad thing you saw") and reported the crime.

Then the bad guys tried to have them "killed", in every sense of the word. They put a "Hit" on them.

(Additionally: Whistle-Blower Gary D. Conley, Wall Street Journal Reporter David Bird, Technologist Rajeev Motwani and over 40 other persons who reported on this matter, died under mysterious circumstances during the course of this investigation. They were all in perfect health the day prior to their deaths)

In this once case, This small American company was working for the government. They had been asked to: "...*help Save America*" by providing the next generation of jobs and energy technologies. Then they saw something they weren't supposed to see. Something involving big political figures and organized crime at the highest levels.

The bad guys stole massive amounts of taxpayer money. The Small American business knew that that sort of behavior was just WRONG. The bad guys specifically targeted The Small American business, in retribution for reporting the crimes, and set about seeking to wipe their business out.

Later, they called the one guy's employer and sabotaged his job, after manipulating a vast number of online data-bases in order to damage his revenue potential. It was a very sophisticated attack.

That was the final straw!

So most of the other people that had been damaged and attacked by the bad guys created an ad hoc task force, comprised of highly effective legal experts, federal cops, federal investigators, intelligence officers, journalists, citizens, policy experts, and others, watching and backing the investigation up. Using both the traditional, and non-traditional legal system. They set about fixing that part of the public policy process.

As of today, it has cost some of the most powerful people in the nation their jobs, their companies, their power and their brands. New laws have been written, and placed into effect, which makes it harder for bad guys to be bad in those ways. A large contingent of public and private members have joined the ad hoc task force and are now on around-the-clock duty watching for bad guy activities.

Then things really got interesting...

After previously winning a congressional commendation, mayoral proclamations, state assembly proclamations, hundreds of letters of commendation and being awarded a federal grant and [a historical set of federal patents for one of their technologies \(which eliminates the need for gasoline\), The Small American business built fully functioning versions of the technology and were then asked, by the Government, to put the sub-system in a full system, to demonstrate the value to taxpayers.](#)

[Unfortunately for them, The Small American business chose to demonstrate with cars.](#)

[This brought the wrath of the Detroit Big-3 \(Old-school cars & oil fuel\), the steel industry \(alternative energy cars don't use much steel\), The oil industry \(Because hey, it's Oil\) , the battery industry \(Which campaign financiers had invested in\) and a bunch of Senators, with insider trading deals and kick-back schemes, down on The Small American business; because That Small American business product would change the profit and power-control chain for those old-school cartels.](#)

Then federal investigators interviewed The Small American business because they had received complaints from almost every other applicant in the DOE program, about the rigging of the Energy program. During those discussions, with federal officials, The Small American business was informed that criminal activities may have been undertaken by federal employees.

FBI Raids, famous agency head departures, Solyndra, famous company bankruptcies, 60 Minutes

investigations and a whole slew of revelations followed, revealing that, indeed something had been "Rotten in Denmark". The Small American business has now been informed, by investigators, which this may have all been about a \$300+ Billion campaign funds laundering thing, via "CleanTech" investors, but that is up to a Special Prosecutor to figure out.

The Small American business went off and did a new technology (SEE "FIRECHAT" and 'SERVAL" SOFTWARE in online searches, for example) but a retribution order had already been put on them and a series of media, economic and physical "hit jobs" were undertaken against them.

As "payback" A hybrid "spy marketing group" , (a rogue operation), was sent in to acquire The Small American business technology and redistribute it for free in order to eliminate its value, this was timed with a media attack coordinated by a sleazy tabloid company who worked with the attackers. This part of the attack included hatchet job hit articles and an attack video. The attack articles and videos were replicated on the web by the tabloid company and a major search engine, in one of the largest re-percussive search engine manipulation attacks ever deployed on the web, aside from Presidential candidate character assassination attacks.

Investigators and major media journalists have now reported that over \$300M U.S. dollars has been spent copying, "adjusting" and distributing The Small American business patented technology, which the hybrid spy marketing group coordinated the swipe on. Investigators now have some of the PO's from this outside incursion. A major global newspaper exposed part of the story. NSA has recordings of some of the bad guys rigging the deals. A Special Prosecutor can get ahold of them.

The Small American business, federal investigators and journalists have now, independently, been able to confirm most of this information via news, FOIA and investigator case files. The 60 Minutes episodes called: THE LOBBYISTS PLAYBOOK and THE CLEANTECH CRASH (SEE VIDEO FILES, BELOW) are a good place to start. There are two federal lawsuits before judges about part of this, you can read them on PACER. There are more coming... There are now hundreds of thousands of pages of evidence, a large number of videos, and many federal, state and major news organization investigation case files available.

This group is bi-partisan. They have glowing letters from Ronald Reagan as well as pictures hugging with Hillary Clinton and Warren Buffet.. They are just Anti-Corruption.

The U.S. Attorney General has now resigned. This brings to 88, the number of high level Washington resignations, by people that are "persons-of-interest" in this case. Most members of the public would recognize the names. Some of these parties have now been indicted. Some media outlets refer to this matter as: "potentially, one of the biggest corruption scandals in American History!"

100% Of US Warming Is Due To NOAA Data Tampering In Order To Put \$100M in Nancy Pelosi Bank Account From Insider Trading

Climate Central just ran this piece, which the Washington Post picked up on. They claimed the US was overwhelmingly hot in 2016, and temperatures have risen 1.5°F since the 19th century.

The U.S. Has Been Overwhelmingly Hot This Year

By *Brian Kahn*

 Follow @bikahn

4,155 followers

Published: December 21st, 2016

While some of the heat was driven by the [super El Niño earlier this year](#), that alone doesn't explain all the records being set, particularly in the latter half of the year after El Niño faded. Climate change has caused the U.S. average temperature to increase about 1.5°F since the 1880s.

[The U.S. Has Been Overwhelmingly Hot This Year | Climate Central](#)

The first problem with their analysis is that the US had very little hot weather in 2016. The percentage of hot days was below average, and ranked 80th since 1895. Only 4.4% of days were over 95°F, compared with the long term average of 4.9%. Climate Central is conflating mild temperatures with hot ones.

They also claim US temperatures rose 1.5°F since the 19th century, which is what NOAA shows.

[Climate at a Glance | National Centers for Environmental Information \(NCEI\)](#)

The problem with the NOAA graph is that it is fake data. NOAA creates the warming trend by altering the data. The NOAA raw data shows no warming over the past century

The adjustments being made are almost exactly 1.5°F, which is the claimed warming in the article.

The adjustments correlate almost perfectly with atmospheric CO₂. NOAA is adjusting the data to match global warming theory. This is known as PBEM (Policy Based Evidence Making.)

Adjustment To USHCN Temperature Vs Atmospheric CO2

The hockey stick of adjustments since 1970 is due almost entirely to NOAA fabricating missing station data. In 2016, more than 42% of their monthly station data was missing, so they simply made it up. This is easy to identify because they mark fabricated temperatures with an "E" in their database.

When presented with my claims of fraud, NOAA typically tries to arm wave it away with these two complaints.

1. They use gridded data and I am using un-gridded data.
2. They have to adjust the data because of Time Of Observation Bias and station moves.

Both claims are easily debunked. The only effect that gridding has is to lower temperatures slightly. The trend of gridded data is almost identical to the trend of un-gridded data.

Time of Observation Bias (TOBS) is a real problem, but is very small. TOBS is based on the idea that if you reset a min/max thermometer too close to the afternoon maximum, you will double count warm temperatures (and vice-versa if thermometer is reset in the morning.) Their claim is that during the hot 1930s most stations reset their thermometers in the afternoon.

This is easy to test by using only the stations which did not reset their thermometers in the afternoon during the 1930s. The pattern is almost identical to that of all stations. No warming over the past century. Note that the graph below tends to show too much warming due to morning TOBS.

NOAA's own documents show that the TOBS adjustment is small (0.3°F) and goes flat after 1990.

https://www.ncdc.noaa.gov/img/climate/research/ushcn/ts.ushcn_anom25_diffs_pg.gif

Gavin Schmidt at NASA explains very clearly why the US temperature record does not need to be adjusted.

You could throw out 50 percent of the station data or more, and you’d get basically the same answers.

One recent innovation is the set up of a climate reference network alongside the current stations so that they can look for potentially serious issues at the large scale and they haven’t found any yet.

NASA: What about the meteorological stations? There have been suggestions that some of the stations are located in the wrong place, are using outdated instrumentation, etc.

Gavin Schmidt: Global weather services gather far more data than we need. To get the structure of the monthly or yearly anomalies over the United States, for example, you'd just need a handful of stations, but there are actually some 1,100 of them. You could throw out 50 percent of the station data or more, and you'd get basically the same answers. Individual stations do get old and break down, since they're exposed to the elements, but this is just one of things that the NOAA has to deal with. One recent innovation is the set up of a climate reference network alongside the current stations so that they can look for potentially serious issues at the large scale – and they haven't found any yet.

[NASA â NASA Climatologist Gavin Schmidt Discusses the Surface Temperature Record](#)

NOAA has always known that the US is not warming.

U.S. Data Since 1895 Fail To Show Warming Trend

By PHILIP SHABECOFF, Special to the New York Times
Published: January 26, 1989

Correction Appended

WASHINGTON, Jan. 25— After examining climate data extending back nearly 100 years, a team of Government scientists has concluded that there has been no significant change in average temperatures or rainfall in the United States over that entire period.

While the nation's weather in individual years or even for periods of years has been hotter or cooler and drier or wetter than in other periods, the new study shows that over the last century there has been no trend in one direction or another.

The study, made by scientists for the National Oceanic and Atmospheric Administration was published in the current issue of Geophysical Research Letters. It is based on temperature and precipitation readings taken at weather stations around the country from 1895 to 1987.

[U.S. Data Since 1895 Fail To Show Warming Trend â NYTimes.com](#)

All of the claims in the Climate Central article are bogus. The US is not warming and 2016 was not a hot year in the US. It was a very mild year.

INVESTIGATIVE GROUP

Imran Awan enters federal court Oct. 6, 2017 / One America News | A Pakistani, DWS Laptop And A Phone Booth

Trump Is Right: A Pakistani Mystery Man Has Documents Wasserman Schultz Didn't Want Prosecutors To See [VIDEO]

[LUKE ROSIAK](#)

[Investigative Reporter](#)

586

A key, if under-covered, aspect of the Pakistani mystery man story is that Imran Awan, the Pakistani-born IT aide of former DNC head Debbie Wasserman Schultz, took a laptop with username RepDWS after he was banned from the House computer network for unauthorized access to data, and then left it in a phone booth with a letter to prosecutors.

On Friday, President Donald Trump [tweeted](#): "Just heard the Campaign was sued by the Obstructionist Democrats. This can be good news in that we will now counter for the DNC Server that they refused to give to the FBI, the Debbie Wasserman Schultz Servers and Documents held by the Pakistani mystery man and Clinton Emails."

Trump appears to have accurately identified a key issue with the Pakistani mystery man that comes straight from court documents.

- Lawyers for Pakistani-born Imran Awan currently have a copy of the contents of a laptop with the username RepDWS
- Wasserman Schultz wanted to block prosecutors from seeing what was on it
- Imran's lawyers have attempted to set up a situation where it is up to Imran whether prosecutors can see the laptop, claiming attorney client privilege
- Other analysts say the laptop should be fair game for review

Each twist has increased the intrigue:

- On Feb. 2, 2017, Imran was banned from the House computer network for making [an unauthorized access to congressional data](#), according to the House inspector general
- This happened not long after Wasserman Schultz was fired from the DNC after a cyber breach, yet she refused to fire Imran or even put him on paid leave, claiming that an [IT aide didn't need to access the internet](#) to do his job
- Wasserman Schultz's refusal to fire him meant he had continued physical access to the congressional office buildings, even though all of his other part-time employers fired him and he knew there was [an ongoing criminal investigation](#)

- On April 5, 2017, despite not being allowed to connect to the House network, he was in possession of a laptop with the username RepDWS and left it in a phone booth, where it was picked up by police who confiscated it because they recognized that it was left there by a criminal suspect

Let that sink in. A Pakistani IT aide, who had just been fired by all his other employers for being a suspected hacker, left a laptop with the username RepDWS in a phone booth. The laptop was placed next to a letter to prosecutors. What it said is not publicly known. The cache of documents also included copies of Awan's ID (which assured that police tied the laptop to a criminal suspect and seized it as evidence rather than returning it as lost property) and a note that said "attorney client privilege," which put the laptop into legal limbo.

Wasserman Schultz's laptop was left in an old phone booth in the Rayburn building like this one. / Photo: DCNF

It is not clear whether the laptop was left out of carelessness or was potentially stolen and possibly planted for police to find.

- It was left in the booth (photo to the right) with highly specific and sensitive materials

- It may have been left there late at night. Building staff called police at 12:21 a.m. to report an unattended bag in the phone booth on the 2nd floor. Imran's attorney said in court that it was snatched by police while he had stepped out of the phone booth to search for better reception: What occurred is a backpack from my client was found, he was trying to get a better signal, there was a note that said attorney client privilege and a hard drive. Gowen later offered TheDCNF a seemingly conflicting account, saying in an email: He wasn't there late at night that is just false.
- The phone booth is in the Rayburn House Office Building. Wasserman Schultz's office is in Longworth, a different building.

What happened next adds to the mystery. On May 17, 2017, Wasserman Schultz used a hearing on the Capitol Police's budget to [threaten Police Chief Matthew R. Verderosa with consequences if he didn't return what she characterized as a member's equipment](#). She repeatedly asked whether it was a member or a staffer who was under investigation, saying since it was a member's equipment, police shouldn't be able to take it unless the member was under investigation. A member of the Committee on Appropriations Legislative Branch Subcommittee, she has significant influence over the Capitol Police's budget.

WATCH:

Play Video

When that didn't work, she escalated, raising the prospect of [re-arranging the Capitol Police's entire board](#) to prevent Verderosa from being a voting member, and lamented that not all of the board's members were subject to oversight by her committee. Questioning Verderosa's boss, Sergeant-at-Arms Paul Irving, she said: We have had jurisdictional issues and a challenging time conducting oversight because of the structure of the Capitol Police Board and there's there being a (inaudible) line rather than a direct line to us in terms of being able to hold the board accountable.

I'd like to know, sergeant, if you think that we should be looking at restructuring the way the board makes decisions so that we can establish a more direct line of accountability. At the end of the day, [the chief] doesn't have a decision-making role, Wasserman Shultz continued.

She also [used campaign funds](#) to hire a lawyer to keep the laptop out of prosecutors' hands. And it wasn't just any lawyer it was [Bill Pittard](#), who until months prior had been working as acting general counsel of the House of Representatives, a position with responsibilities that include deciding what to turn over to the executive branch pursuant to legal activity.

In August, after Imran's arrest at Dulles airport, Wasserman Schultz changed her tune, saying This was not my laptop. I have never seen that laptop. I [don't know what's on the laptop](#). She said it was Imran's laptop but purchased using taxpayer funds from her office.

She said Imran's due process rights had inspired her demeanor during the Capitol Police exchange and the lengths to which she went to shield the laptop. She then said she was no longer seeking to block prosecutors from looking at the laptop.

But by then, Imran had taken up the same quest. In September, prosecutors [turned over a copy of the government laptop](#) to Imran, even though he had been banned from the House network because he was viewed as a threat. In October, Imran's attorney, Chris Gowen a former aide to Hillary Clinton said in court that Imran was invoking attorney-client privilege on the laptop and that they [feel very strongly that the hard drive not be able to be used as evidence](#).

Re: *U.S. v. Imran Awan*, 17-CR-161

Dear Mr. Page:

Enclosed please find a forensic image of the hard drive, which was recovered from the Longworth House Office Building on April 6, 2017, and a forensic image of the laptop computer, which was seized from your client at the time of his arrest. Also enclosed please find copies of materials from the notebook and laptop bag, which also were recovered from the Longworth House Office Building on April 6, 2017. Please let us know if you have any questions or concerns.

Sincerely,

CHANNING D. PHILLIPS
United States Attorney

Prosecutors gave Imran a copy of the laptop found in a phone booth / Federal court records

That seemed to set up a situation where Imran was shielding the laptop that Wasserman Schultz had initially not wanted examined, but where it would be within his power to drop the objection. That's significant because House sources have said that Democrats aren't cooperating with the Awans' prosecution, and raised questions about whether he has [leverage over](#) them.

Former U.S. Attorney Andrew McCarthy questioned that attorney-client privilege applies to the laptop at all, saying, "If I give my lawyer my bank records and ask him if they show evidence of a crime, the bank records [do not become \[attorney-client\] privileged](#) — only his advice to me would be [attorney-client] privileged. And if I stuck a sign on my bank records that said " [attorney-client] privileged documents," that would not make them [attorney-client] privileged documents."

Wasserman Schultz has declined to answer questions about the laptop, but given that it was government equipment that, as she noted previously, belongs to her, she might be able to explicitly give permission to prosecutors to look at it. In particular, if Imran wasn't authorized to have the laptop, it could be more difficult to invoke privilege on it. (Wasserman Schultz's brother is an assistant U.S. attorney at the same office that is handling the case, and he has [tweeted dismissively](#) about it.)

Rather than simply swatting down the claim and using what McCarthy said is the universally employed solution to such a dilemma — using a "taint team" to go through the laptop and isolate specific files that are communications to Imran's lawyer — prosecutors have delayed the court hearing five times, telling the judge repeatedly: "The government has been in discussions with counsel for the defendants regarding complex discovery issues and other legal issues in this case, in particular issues surrounding claims of attorney-client privilege being raised by defendant Imran Awan," [court papers](#) filed Tuesday say.

The next court date is set for May 4, though could be postponed a sixth time.

The [IT guys in the House criminal probe](#) could read these members' emails

The Awans and their associates collected more than \$5 million in pay from congressional offices, often drawing chief-of-staff level pay though there is reason to believe many didn't even show up. The House's [internal probe](#) found they logged into servers they had no affiliation with, used members' usernames, covered their tracks, and persisted even after being fired.

The money is broken down by year, congressional office and family member paid:

Imran, Abid and Jamal Awan and Hina Alvi, Natalia Sova, Rao Abbas, Hasseb Rana, and Muhammad Awan.

A DETAILED EXAMINATION OF THE ROOTS OF DOMESTIC NATIONAL POLITICAL CORRUPTION AND A PLEA FOR ELECTED OFFICIALS TO ACTUALLY DO THEIR JOBS FOR THE AMERICAN PUBLIC

"Dear White House:

For years, we have been asking our government representatives to do something, anything, about this matter. We have gotten no reply, stone-walling, cover-ups and zero effort. That is shameful!

This matter affects every voting citizen because, if we can't get justice in America, then no voter will believe they can either.

A handful of corrupt tech billionaires, and their corrupt Senators, are manipulating the taxpaying voter's emotional triggers in order to steer, and money-launder, a trillion U.S. taxpayer dollars into their private bank accounts. Over 300 million American voters have said that the #1 issue with U.S. public policy is â CORRUPTIONâ . This issue is about that corruption.

Their â climateâ , â immigrantsâ , â medical coverageâ issues are fake controversies that they use to scam U.S. Treasury funds that have nothing to do with those â cover issuesâ . They use Google, Facebook, Twitter and the "Main Stream Media", that they own, in order to pump up these fake controversies via fake news. They use "Dark Money" fake charities, "Invisible Bridge" money laundering, crony stock market insider trading and pump-and-dump schemes, revolving door payola, prostitution bribes and other illicit corruption tricks.

We are fighting back and we have already taken out part of the "bad guys", and their schemes, using 100% legal tactics and methodologies.

Any member of the public can now accomplish these anti-corruption efforts using espionage journalism, private investigation methods, citizen sleuth websites, class-action lawsuits and personal mass public media distribution. We encourage the public to continue in their efforts to bankrupt every single corrupt party that abuses our Democracy.

In our matter, the U.S. Government, via the Obama White House and the U.S. Department of Energy intentionally defrauded us out of years of work and our life savings! Now they owe us some offsets! We are here to collect.

We could not understand how "public servants" could do these kinds of crimes to, and with, our government while stealing our, and millions of other taxpayers, money out of our pockets. We set out to hunt down every single person, group and process that allowed these crimes to happen, document their crimes on permanent public record and then make it nearly impossible for them to ever do this to the public again.

We were tricked by false government promises into spending years of our lives and millions of dollars of our life savings. We, and our peers, were used as the "facade" of a "cover story" to operate a criminally illicit "Dark Money" operation against the American public. We swear, warrant and certify that we can prove every assertion in a public federal jury trial, Grand Jury hearing and/or televised Congressional hearing, given equitable credible legal resources and security protection.

Senior government officials had full knowledge of, and participated in, this criminal enterprise. They knew, from the start, that the state and federal funding was covertly hard-wired, in advance, exclusively to their friends. They then attacked us with "Fusion GPS", "Lois Lerner Targeting", a tabloid character assassination program and worse things. They attacked us because we properly reported the crime to the FBI and Congress. They attacked us because we did "the right thing".

The cover-ups of this crime continue to this day. The failure of the U.S. Government to provide any 1.) apology, 2.) damages offset, 3.) justice, 4.) whistle-blower and informant fees; in this matter continues to this day. We are not anti-government. We are anti-corruption. In fact, top government officials are helping us in our quest.

For our first project, almost every taxpaying member of the public supported our past efforts and, in fact, provided us with a historically large number of purchasing letters of support which we hand-delivered to Congress. Nobody else was able to do that.

The non-crony major international news outlets, every major industrial publication, most of the non-crony members of the U.S. Congress, and every other non-crony public official confirmed that "Part Two" of our project was a "go". After winning Congressional awards and fully delivering on our previous government contracts, federal officials asked us to invest our time and money in the federal government and do even more to create domestic jobs and new domestic technology opportunities.

BUT :

...it turned out that all of the government "deciders" worked for and owned stock in our arch competitor. The government officials took the money they had promised to us and gave it to their friends, who are our competitors. They gave it to the least qualified party; who also happened to be their buddy and their campaign financiers. They also gave part of the taxpayer cash to some of their friends who

immediately filed bankruptcy in order to make huge profits off of tax loss filings and stock market valuation â pumpsâ without ever having to create any jobs or ongoing product deliveries.

We were asked to pay bribes and we refused to pay bribes. We refused to be part of the Silicon Valley â Dark Moneyâ crimes. We knew these people. We were invited to their parties and to their most intimate meetings. When we saw that they were running afoul of Democracy using corrupt schemes, illegal insider trading, sextortion, money laundering, tax evasion, bribes, prostitutes, Dark Money conduits, election rigging, internet manipulation and other crimes against the public; we said NO!

Will the U.S. Government provide us with the justice we seek and the Constitution demands?

We have worked with exceptional FBI, GAO, SEC, CFTC, IG and Congressional staff in this matter and we wish to acknowledge their support. Many have seen the recent news head-lines about top-level law enforcement firings of corrupt law enforcement executives. Those were the right moves and we wish to confirm the fact that certain public officials continue to stall our justice. Treasury and GAO say that over 180 million taxpayer dollars have been spent on cover-ups, attacks and DOJ stalls against our request in order to avoid political embarrassment for the Obama Administration. They are no longer around and they SHOULD be embarrassed by their corruption! You can resolve our matter for dramatically less money than you are spending trying to cover it up!

We will not give up and we will fight to the end. Our Task Force of crime victims, journalists, bloggers, mass data scientists, intelligence specialists and voters is now using 100% legal means to terminate every single crook in this case until we get justice. We demand a resolution where our damages are paid for and the whistle-blower and informant fees we are owed are delivered.

The news articles and Congressional reports prove that this Silicon Valley Cartel regularly engages in crimes, sex abuse, illicit acts, a sociopath culture and law-breaking. Fact-based forensic data has now been published representing the work of tens of thousands of renown, award-winning journalists and researchers. They prove that what we are saying really did happen and it really is a criminal abuse of Democracy! The ICIJ, Snowden, Assange and Binney leaks prove the depth of the crimes. Hundreds of thousands of documents have now been placed on public record in the federal courts and P2P archives and those documents prove who engaged in these crimes and how they did it. The 60 Minutes episodes, The feature films: Dark Money; Too Big To Fail; Inside Job and the tens of thousands of broadcast news segments about this corruption all prove our assertions. The evidence is indisputable!

It is time for the public to take a stand against this kind of organized crime that is operated by the very people that are meant to serve the public!

It is time for The U.S. Government and The U.S. Department of Energy to deliver the 1.) apology, 2.) damages offset, 3.) justice, 4.) whistle-blower and informant fees that are required."

QUESTIONS?

Q. Where is your proof?

A. Here is the proof:

- <http://www.DC-crimes.com>
- <http://www.slush-fund.com>
- Federal court records on file at <http://www.pacer.gov>
- FBI 302 and case evidence files submitted by our peers
- Congressional Ethics Committee reports on public record
- GAO investigation reports we helped produce
- and thousands more web repositories we are happy to share...

As a matter of fact, we have submitted over a million pages of evidence produced by the best, and brightest, FBI agents, criminal investigators, forensic researchers, investigative reporters, insider whistle-blowers and former agency employees. In fact, our complaint evidence sets comprise over 6 TERRABYTES of data. That is quite a bit of hard evidence. Additionally, there has been very little credible push-back from any major entities, aside from those charged with the crimes. In other words, every well-known entity who was not a crook involved in these embezzlements has verified our charges.

Q. Why don't we hear more about this in "the news"?

A. Because print news media has gone out of business and most of the online news, especially Google, YouTube, Facebook, Twitter, Huffpo are owned or invested in by the very people who are charged with the political bribery, insider trading, election manipulation and corruption. They order their news outlets, which now are the majority of news publishers in the world, to NOT cover news about these crimes because it will embarrass them and cause the FBI and Congress to look at them more closely. We are not going to let this be covered-up.

Q. Why don't you just sue all of the people and agencies who did these things to you?

A. The attacks on us were designed to eliminate our finances so we could not afford law firms. If we could sue each one of the bad guys and afford the same lawyers as the bad guys, we would win every case. Each case costs over two million dollars in legal expenses. There are many cases. Our legal rights were blockaded by carefully crafted rights elimination tactics. In America, you can only get a lawyer for free if you kill the opposition bad guy first. In other words you only get a free lawyer if you commit a murder.

Q. Isn't it the job of the FBI and the DOJ to help citizens like you with injustices like this?

A. As the world saw with the recent firings of the top staff at the FBI and DOJ; top law enforcement bosses are often more focused on cover-ups of crimes than the prosecution of crimes. We have helped get hundreds of famous political people fired for corruption but that does not fully solve our issue.

Q. What are you asking for?

A. Justice, a written apology, to get our damages paid for, the firing of every corrupt official involved and delivery of the whistle-blower fees we were promised.

Q. Who have you contacted to try to get this resolved?

A. Using certified mail, receipt-based FEDEX and time-stamped and tracked electronic communications we have contacted every law enforcement agency, regulatory agency, their heads of office and every elected

representative through every known official channel and back-channel for nearly a decade. We have only encountered finger-pointing to some other agency and an official "not my circus, not my monkey's" attitude of "just ignore them, maybe they will go away".

Q. Who else can we contact to confirm that these crimes and stock market corruptions took place and are still taking place.

A. These groups:

- <http://wearethenewmedia.com/>
- <https://www.icij.org/>
- <https://www.transparency.org/>
- <https://www.judicialwatch.org>
- <https://corruption123.com>
- <https://wikileaks.org>
- <https://causeofaction.org>
- <http://globalinitiative.net/>

And over 400 other organizations we can introduce you to...

Q. Are you associated with any political party?

A. No. We are neither Democrats nor Republicans. We are domestic American taxpayers who were raped by our own elected representatives who were profiteering off of these crimes. We represent the American citizens!

SO WHY ARE WE NOT GETTING ANY RESPONSE, ANY JUSTICE AND ANY OFFSETS FROM THE VERY PEOPLE WE PAY TO PROTECT AND SERVE US?

WE DEMAND THAT THESE CRIMINALS BE ARRESTED OR ELSE WE WILL PERFORM CITIZEN ARRESTS ON EACH AND EVERY ONE OF THEM!
