New Google Glass Pandemic: Undetectable Upskirt Photos and Videos

Freaks with Google Glass are wandering around high traffic downtown areas, public transit and, particularly, at lunch times and commute hours, holding their Google Glass at their sides, arms length down, lenses up.

They affect the appearance of being polite and not offending those around them by being an obvious "GlassHole" but, in reality, they are only pretending to not be using their Google Glass.

Actually, these creeps are capturing upskirt images and videos up women's dresses and sending them off to their cloud storage servers. They also hang them over, or hold them under, bathroom stalls, to catch people in private repose.

Even if the police catch them, the images are already offboard on their cloud servers.

The soul-less [Silicon Valley Techno-idiot VC's rectal-cranial induced tone-deafness](#) about the danger of what they are plowing our retirement funds into is only surpassed by their desire to [mood manipulate](#) and [data-mine](#) us all at any cost. Google has lobbied Senator's (Including Feinstein, their bought-and-paid for Senator) to NOT have to put a bright red "RECORDING IN PROGRESS" LED on the front of GOOGLE Glass. ACLU disagrees.

Activist and community groups are now demanding:

"Make it a FEDERAL LAW: put a bright red "RECORDING IN PROGRESS" LED on the front of all live public video cameras"

Send in your links, let's discuss..
